PRESS RELEASE — FOR RELEASE: Tuesday 26 May 2025

Builder Assist and Haulotte join forces to bring construction-site robotics to aerial work platforms

The specialist in people-lifting solutions and the DeepTech startup combine their expertise to enable the integration of Builder Assist's construction robot onto Haulotte aerial work platforms.

THE ANNOUNCEMENT

Builder Assist and Haulotte announce a strategic partnership aimed at enabling the integration of the Surface Assist robotic solution onto Haulotte aerial work platforms.

A global leader in people-lifting equipment, Haulotte becomes Builder Assist's reference partner for work-at-height applications.

This partnership allows Surface Assist — Builder Assist's multi-trade construction robot — to be integrated and validated on Haulotte aerial work platforms. This collaboration combines Haulotte's expertise in lifting solutions with Builder Assist's robotic innovation, around a shared ambition: supporting the evolution of construction sites toward operations that are more assisted, more efficient and suited to complex working environments.

Get an exclusive first look at the inaugural presentation of the Surface Assist product at the ConTech Connect event on 28 May at Station F. 🚀 #BuilderAssist.

> *“ A construction robot is only valuable if it operates where the work is most dangerous and most demanding. We are delighted to announce our collaboration with Haulotte to bring together the best in lifting equipment and the best in construction robotics.”*
>
> **Alban BRISY, co-founder & CEO, Builder Assist**

> *“This collaboration with Builder Assist reflects our commitment to supporting the evolution of construction sites with innovative solutions, tailored to field realities and to the new ways of working at height.”*
>
> **Philippe LUMINET, Innovation Director, Haulotte**

ABOUT HAULOTTE

Haulotte Group is a global reference player in the field of work at height. The group designs, manufactures and markets a broad range of aerial work platforms for professionals in construction, industry and maintenance. Present in more than 100 countries, Haulotte is recognised for its work-at-height expertise and the quality of its solutions.

SOCIAL MEDIA VERSION

LinkedIn	Builder Assist and @Haulotte join forces. Haulotte, a global leader in people-lifting solutions. Builder Assist, the Deep Tech startup developing Surface Assist, its multi-trade construction robot. Together, we are enabling the integration of Surface Assist onto Haulotte aerial work platforms, to operate as close as possible to work carried out at height on construction sites. An alliance between work-at-height expertise and construction-site robotics innovation. 🏗 📍 Join us on 28 May at ConTech Connect, at Station F, for the product’s first public presentation. #BuilderAssist #Haulotte #Robotics #ConstructionTech #AerialPlatform
