PRESS RELEASE — RELEASED: Tuesday, May 26, 2026

Builder Assist and Schneider Electric: the reference cobot at the heart of Surface Assist

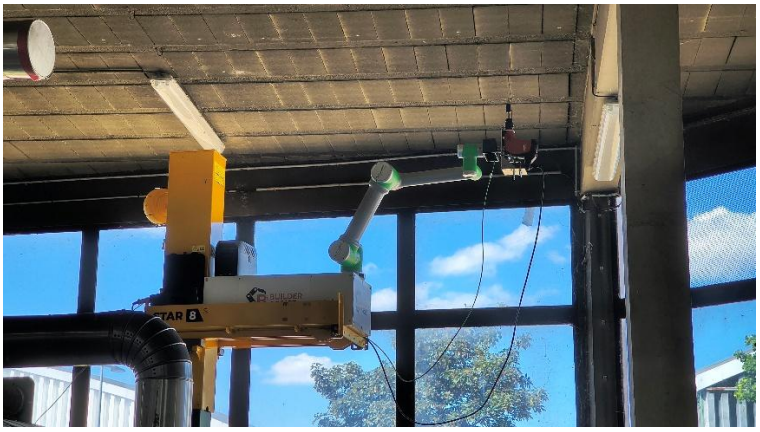

Schneider Electric becomes Builder Assist's cobot partner, supplying the collaborative robotic arm integrated into Surface Assist to operate safely on construction sites.

THE ANNOUNCEMENT

Builder Assist today announces its partnership with Schneider Electric, which becomes the startup's cobot partner. Schneider Electric's collaborative robotics technology is integrated at the core of Surface Assist, the first general-purpose construction robot mounted on aerial work platforms.

This partnership combines the industrial expertise and ruggedness of Schneider Electric's cobots with Builder Assist's know-how in robotic integration on construction sites. Together, the two companies ensure that Surface Assist is equipped with the best robotic arm to perform the most demanding tasks at height.

Get a first look at the product at ConTech Connect on May 28 at Station F. 🚀 #BuilderAssist.

> *“ Co-developing Surface Assist with the French engineering teams of one of France’s largest industrial groups is both a source of pride and a real accelerator. Schneider Electric’s robotics expertise and the depth of its service network allow us to go, starting today, where our customers need us to be: on their most demanding construction sites, anywhere in the world.”*
>
> **Alban Brisy — CEO, Builder Assist**

> *“ This partnership between Builder Assist and Schneider Electric marks a new milestone in the industrialization of construction sites. By integrating Schneider Electric’s collaborative robotics technology at the heart of Surface Assist, we bring precision, safety, and industrial ruggedness to operators working at height. This partnership perfectly illustrates our ambition: to put our expertise and know-how at the service of automation that is more accessible, safer, and ever more useful in the field. ”*

ABOUT SCHNEIDER ELECTRIC

Schneider Electric is the global leader in energy technologies, delivering efficiency and sustainability through the electrification, automation, and digitalization of industries, businesses, and homes. Our technologies enable buildings, data centers, factories, infrastructure, and electrical grids to operate as open, interconnected ecosystems, thereby improving performance, resilience, and sustainability. Our portfolio includes connected products, leading-edge software architectures, AI-powered systems, digital services, and specialized consulting. With 160,000 employees and 1 million partners across more than 100 countries, Schneider Electric is consistently ranked among the world’s most sustainable companies.
